# Job Description – Full Stack Engineer

## Who are we?

Welcome to Spense - The Future of Banking!

In an era where digital transformation is redefining every aspect of our lives, we at Spense believe that banking should not be any different. That's why we're on a mission to build India's most advanced open banking platform that enables banks to launch their fintech faster, collaborate better, and stay compliant forever.

Founded with the aim to transform the traditional banking industry, we strive to bridge the gap between aging banking infrastructure and rapidly evolving customer expectations. In the digital age, banking shouldn't be restricted to branches or old systems. At Spense, we aim to weave banking seamlessly into daily life, making it accessible everywhere. By connecting banks with fintech, enterprises and other co brand partners using our platform we aim to embed banking into the fabric of daily life across the applications we use every day.

Our team comprises forward-thinking innovators, technologists, and financial experts dedicated to creating a transformative digital banking platform. We leverage cutting-edge technology to provide a robust, secure, and scalable solution that enables banks to offer modern and customer-centric services. With Spense, banks can redefine their digital journey, creating a superior and seamless banking experience for their customers.

But we're not just building software; we're building the foundation for the future of banking. We see a world where banking services are intuitive, accessible, and effortlessly integrated into daily life, empowering customers and businesses to manage their finances with ease and efficiency.

Join us on our mission to revolutionize banking, one transaction at a time. Welcome to Spense, the banking OS of the future.

## What we're looking for

We're looking for passionate developers to join the engineering team of Spense. We are a cross-functional team in which product, design, data science, backend, web, frontend, Android, and iOS engineers work collaboratively to design and build products to help people take control of their money and live stress-free.

## What you will need?

- Grit, drive, and a deep feeling of ownership
- Excellent problem-solving, critical thinking, and communication skills
- Basic knowledge and comfort with Node.js
- Understanding of designing, implementing, and unit testing frontend application code
- Familiarity with modern UI frameworks like React, Angular, Vue, or Svelte (We use Svelte but experience with other frameworks is welcome)
- Enthusiasm for writing reusable code
- Basic understanding of the test-driven development paradigm
- Familiarity with MySQL and MongoDB
- Interest in benchmarking and optimization
- Proficiency with a code versioning tool (e.g., Git)

## Your day-to-day responsibilities

- Develop, maintain, and enhance scalable and secure software and solutions
- Ensure the best possible performance, quality, and responsiveness of the application
- Identify and correct bottlenecks and fix bugs
- Work with cross-functional teams to create a compelling application with a great user experience
- Collaborate with team members to ensure effective communication and project completion
- Participate in code and design reviews to provide feedback and ensure adherence to project standards
- Continuously learn and stay updated on emerging technologies

## Benefits

- At Spense, you learn on the job. You'll be surrounded by some very smart people from different backgrounds who are happy to work with you to help you do your job better.
- We don't have a classic hierarchical structure full of red tape and bureaucratic titles. You're on a first-name basis with everyone from Day One. We're all good at what we do, and we respect that.
- Boundaries are respected. You have your personal time and space away from your work laptop when you need it.
- Spense is not a remote-work company. We believe in collaborating together in a physical office space. We are a young company with an evolving culture, and working in person with each other is key at this point. We are located in Bangalore.
- We love to disagree respectfully. We work across functional boundaries, and nobody is too wise. This industry evolves every single day, and healthy debate is the only way to keep pace with change.
