Executive Summary

Computer Science undergraduate and Software Developer with experience building full-stack applications using Node.js, React, PostgreSQL, and Redis. Experienced in backend development, REST APIs, database design and optimisation, real-time systems, and automation. Strong foundation in data structures and algorithms with hands-on experience developing scalable software solutions.

Education

SRM Institute of Science and Technology — Chennai, Tamil Nadu

B.Tech - Computer Science & Business Systems (CSBS) - CGPA : 9.11/10 — May 2027

Senior Secondary (Class 12), Doveton Group of Schools - Percentage: 88% — May 2023

Experience

Software Developer (Part-time) |Syed Glass Merchant — Jan 2026 - Present

- Developed an AI-powered insurance form automation tool using the Google Gemini API to extract customer information and automatically populate application forms, reducing manual data-entry effort by approximately 60%.

Projects

AI-Powered Career Preparation Platform — Project Link

PostgreSQL, Express.js, React.js, Node.js, Redis, WebSockets, Docker, LangChain, LangGraph

- Developed a full-stack AI career preparation platform analyzing coding progress, resumes, and job descriptions to provide personalized interview preparation insights.
- Built LangGraph-based adaptive interview workflows for role-specific question generation, response evaluation, and performance-based follow-up questions using LLMs.
- Implemented AI-powered Resume-JD analysis with LangChain and structured LLM outputs to identify skill gaps and matching skills, with Redis and WebSockets enabling asynchronous processing and real-time updates.

URL Shortener — Deployed Site

Node.js, Express.js, PostgreSQL, Redis, Docker, WebSockets

- Built a scalable URL shortener with custom aliases, Redis caching, and rate limiting, handling 500+ requests/day while reducing observed redirect latency by ~20% between cache-miss and cache hit requests.
- Optimized PostgreSQL lookups using B-tree indexing and unique constraints, with indexed short-URL lookups executing in ~0.04 ms on the production database.
- Dockerized the database and migrated it from MongoDB to PostgreSQL, to improve relational integrity, query performance, and structured data analysis.

Skills

- **Languages:** C++, JavaScript, Python, TypeScript, Java
- **Backend:** Node.js, Express.js, REST APIs, Drizzle ORM
- **Databases:** PostgreSQL, MongoDB, MySQL, Firebase, Redis
- **Engineering:** Data Structures & Algorithms, SQL, NOSQL, System Design, Caching, API Security,
- **Frontend:** React.js, Tailwind CSS, HTML5, CSS3, Responsive Design
- **Tools:** Docker, Git, GitHub Actions (CI/CD), AWS (SES)
- **DSA:** Leetcode - 100+ problems solved
- **Soft Skills:** Problem Solving, Team Collaboration, Communication, Adaptability, Continuous Learning
